

Chroma-Q™ Color Punch

Super Bright Results From a Compact Fixture

The Chroma-Q™ Color Punch™ is extremely powerful for its size, providing lighting designers with a very punchy 1,250 lumens output in a compact fixture.

Combined with its IP65 rated*, tough machined aluminium and high impact plastic casing, this makes the Color Punch suitable for use on even the most demanding lighting applications.

The fixture is also extremely quiet, featuring convection cooling for completely silent operation in theatres and other noise-sensitive lighting environments.

For ease of use, the Color Punch also features a built-in power supply and choice of stand-alone or DMX-controlled effects modes.
